Highly effective in unsaturated
vegetable oils

3X more effective than synthetic

**Kensing Produces
the Highest Purity Plant-based
Tocopherols in the World**

Advantages of Kensing Plant-based Antioxidants

Best-in-class oxidation protection.

Plant-based mixed tocopherols are the best natural antioxidant on earth to stabilize natural formulations.

Odorless with excellent organoleptic profile for use in cosmetics. Helps retain color and product texture. Protects vegetable oils against oxidative rancidity and maintains formulation stability.

Natural benefits.

- 100% Natural, Plant-derived
- Sustainable
- Kosher and Halal Certified
- Low Carbon Footprint

Applications. As modern natural formulations are heavily loaded with vegetable oils, they need even more antioxidant protection to ensure a long product shelf life. Covi-ox® plant-based mixed tocopherol protects natural formulations—the way nature intended.

The Purely Best Supplier

Higher purity and potency.

Kensing's unique process leads to a level of purity that sets the standard in the industry.

Proven experience. With more than 50 years of history in purification of plant-based vitamin E, we are the world's original supplier of plant-based vitamin E, and one of its purest suppliers.

Continual supply security. As one of the world's largest Vegetable Oil Distillate (VOD) purchasers, we provide supply certainty.

Covi-ox plant-based mixed tocopherols are 3x more effective than synthetic DL-alpha-tocopherol and up to 10x more effective than other antioxidants at extending the shelf life of natural oils.

Percent Shelf-Life Extension of Almond Oil (OSI at 110°C)
